

## *Freedom in planning*

... healthy growth for the tree.

### Large-area tree protection grill systems 2.0

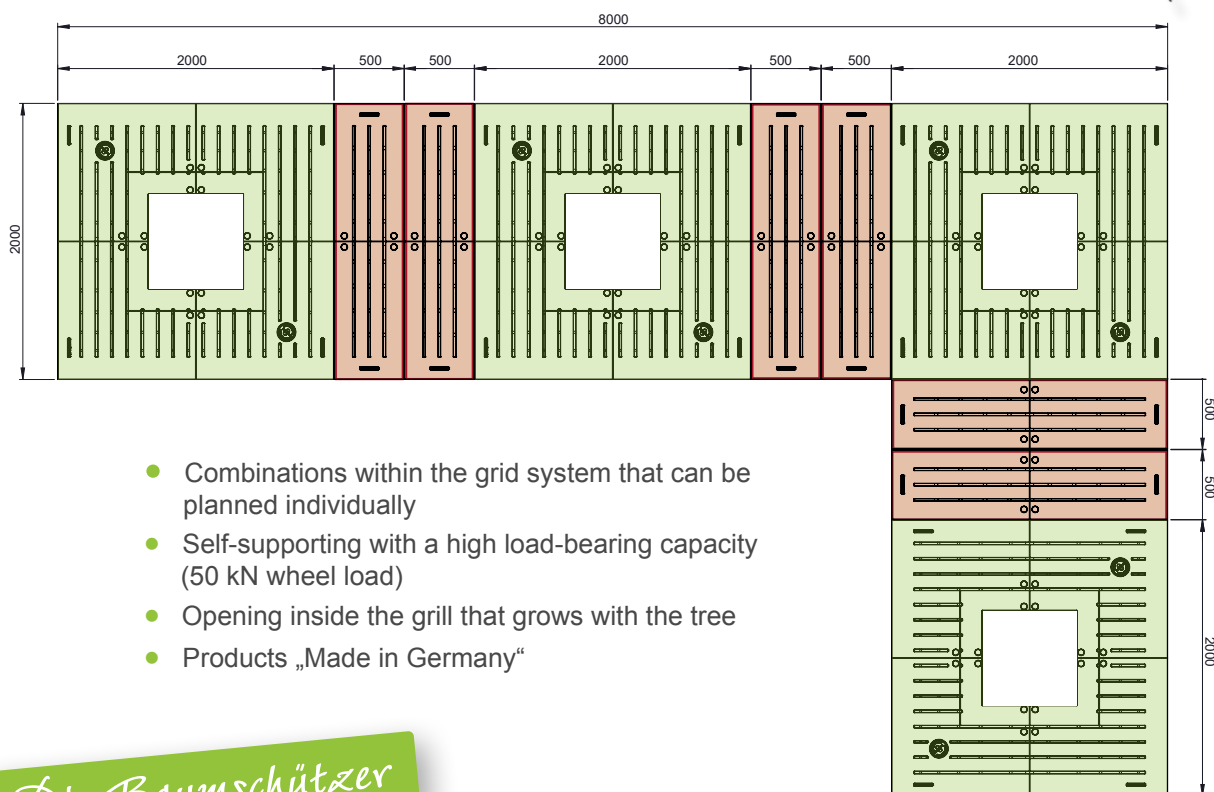

Trees form the basis for an attractive cityscape and an environment worth living in. However, there is not always enough space for these oases of greenery. Yet a site for trees needs to be suitably designed to guarantee healthy growth.

Our large-area grill systems open up countless new possibilities in this regard and give planners virtually unlimited scope for creativity. The combinations this produces enable healthy tree growth and an attractive design for the surrounding streets.

**Tailor your designs to your requirements and ideas!**

## A new degree of variety in tree grill systems

- Combinations within the grid system that can be planned individually
- Self-supporting with a high load-bearing capacity (50 kN wheel load)
- Opening inside the grill that grows with the tree
- Products „Made in Germany“

*Die Baumschützer*
