

Guiding principles of the MeierGuss group

We, the MeierGuss group, are and will remain a powerful, independent, family-owned company specialising in the production and processing of cast products. Our core fields are drainage engineering and other high-quality cast and concrete products for industrial customers and specialised wholesale traders.

Our motivated employees do their very best to provide our customers with reliable support at all times. A broad range of high-quality products and qualified application consulting are our focus. Professional training and further education for our employees are important for us.

Top quality and safety in our daily work is our goal. That is why we invest in our employees' expertise and promote an independent work mindset. We provide the necessary means to achieve our strategic and operational goals.

Our products are environment-friendly and recyclable. We undertake to continuously improve the energy performance and environmental characteristics of all of our production processes while taking health and safety into account and simultaneously improving the integrated management system.

We support procurement of energy-efficient products and services. When planning new systems and processes with crucial effects on our energy performance or modifying old ones, we take measures for energy improvement, if these make technical and economic sense.

We undertake to comply with all applicable legal and other requirements that are relevant to the MeierGuss group such as energy, environment, product and health and safety regulations to protect our employees and our environment.

It is our constant motivation to reduce negative environmental effects and wherever possible also to prevent.

We undertake to implement the requirements agreed with our customers and lead an open dialogue with interested parties.

To support the implementation of these guiding principles, we use the management systems for quality (DIN EN ISO 9001), environment (DIN EN ISO 14001) and energy (DIN EN ISO 50001).
